

Dhruv Singh Bisht

+91-6397666874 | dhruvbist123@gmail.com | LinkedIn | GitHub | LeetCode

Education

Dr. Ambedkar Institute of Technology, Bangalore, Karnataka

08/2023 – 08/2027

Bachelor of Engineering in Artificial Intelligence and Machine Learning

Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Technical Skills

Languages: Python, Java, SQL, JavaScript

Frameworks: Flask, FastAPI, React.js, Node.js, Bootstrap

AI/ML: Machine Learning, Deep Learning, Natural Language Processing, Transformers

Cloud & DevOps: AWS, Docker

Databases: MySQL, MongoDB

Tools: Git, GitHub, Linux, MAVLink

Coding Profiles

- Solved 200+ Data Structures and Algorithms problems on LeetCode.
- Built and maintained multiple GitHub repositories across AI/ML and full-stack development projects.

Projects

Autonomous Underwater Vehicle (AUV) AI System

08/2025 – 03/2026

- Engineered an autonomous underwater vehicle by integrating 5 hardware modules using Jetson Orin Nano and Pixhawk.
- Implemented real-time obstacle detection and depth monitoring for autonomous navigation using Ping Sonar.
- Controlled 4 thrusters through MAVLink and PyMAVLink communication, enabling stable underwater maneuvering.

Cricket Tournament Management Platform

12/2025 – 02/2026

- Developed a full stack tournament management platform supporting 100+ player registrations and team administration.
- Designed a MySQL database consisting of 5 relational tables for players, teams, auctions, and match records.
- Automated auction and squad management workflows using Flask, JavaScript, and MySQL.

Spam Detection Website

09/2025 – 11/2025

- Built an NLP based spam detection system trained on 30,000+ email samples from the Enron dataset.
- Achieved 96% classification accuracy using TF-IDF vectorization and Multinomial Naive Bayes.
- Developed a Flask web application capable of classifying email messages in real time.

Achievements

- Ranked within the Top 10% in multiple hackathons focused on AI and software engineering.
- Advanced through institute level screening in Smart India Hackathon (SIH).
- Led the Machine Learning team for an Autonomous Underwater Vehicle (AUV) project at NeptuneX Club.
- Built projects across AI/ML, NLP, Full Stack Development, AWS, and Docker.
